

# Skin Care line

## Anti-ageing & wrinkles

Time Exception day cream (SPF 15)  
Time Exception night cream  
Time Exception body cream  
Time Exception serum  
Time Exception pure essence  
Time Exception mask  
Time Exception collagen mask

## Cellular moisture

Hyaluronic acid cream  
Hyaluronic acid body cream  
Hyaluronic acid serum  
Hyaluronic acid pure essence  
Hyaluronic acid mask  
Hyaluronic acid collagen mask

## Cleansing & exfoliation

Cleansing cream  
Lotion hydro-gel  
Enzymatic peeling cream  
GS peel

## Wrinkles and expression wrinkles

Lift BTX serum  
Oxygen repulping serum  
Lift BTX pure essence  
Lift BTX collagen mask

## Eye bags & dark circles

Eye contour cream  
Eye contour pure essence  
Eye contour collagen mask

## Whitening & uneven skin tone

White exception day cream (SPF15)  
White exception night cream  
White exception serum  
White exception pure essence  
White exception mask  
White exception collagen mask  
Foundation cream (SPF20)

## Cellulite and localized fat

XS contour body cream  
XS contour pure essence  
Algae peel-off mask

OXYNERGY PARIS®

Welcome to **Oxynergy Paris®**, a professional skin care issue from intensive research in aesthetic & anti-ageing medicine practices and knowledge. An inspired & premium skin care solution to achieve a perfect healthy skin through cellular oxygenation and bio stimulation. At peak vitality, a cell breathes, communicates, grows and reproduces. The common denominator in these vital functions is the process of oxygen consumption, sign of a good metabolic activity. This process is severely affected by modern lifestyle, due to urban pollutants, free radicals and environmental attacks. The skin cells are suffering and their metabolic potential decreases. It results in a reduction of the cellular activity and regeneration; the skin becomes duller, less tonic and shows the first signs of ageing.

**Oxynergy Paris®** skin care stops this process, maintains the skin in its optimum condition and restores damaged & aged skin. As foundation stone is the **“Oxygenation Factor”**, an exclusive natural active ingredient issued from a controlled hydrolysis of soy proteins. This incredible blend of peptides, essential minerals & amino acids, boosts oxygen consumption, increases the energy levels of the skin cells and stimulates cellular renewal for a brighter radiant skin. Each product responds systematically and on-target to the various skin problems by using the Oxygen Factor in synergy with active systems.

#### Skin care specificities

“Oxygenation factor” in each product • The active ingredients incorporated in our formulas are mostly issued from anti-ageing & aesthetic medicine • Each active ingredient is dully vectorized in cyclosystem, liposystem or esterified to enhance their skin penetration, efficiency and stability • Each active ingredient have been submitted to efficiency test • Paraben-free, no harmful preservatives, paraffin, silicones, fragrances, colourings, chemical sunscreens and animal origin ingredients • Pure essence are sterilized formulas • Enhanced formulation technologies (“bi-gel” & “micro-dispersion”) • All skin type compatibility of the formulas from dry, normal to the most sensitive skins • Exclusive sensorial mapping • Each active ingredient is issued from biotechnology and/or natural source • pH values have been set in a way that allows the skin to recover its balance • None of the raw material and the finished product are tested on animals • Formulated by French cosmetologists, and tested by doctors and dermatologists

On top of our intensive research on active systems, Oxynergy Paris is using the exclusive formulation technologies: “bi-gel” & “Micro-dispersion”. The **“bi-gel”** technology is used for cleansing, exfoliating and serums products to reach the highest skin tolerance as it permits, to avoid using surfactants, alcohol and other harmful irritating ingredients. Oil droplets are “free”, in a gel water based network, the formula melts over the skin. The **“Micro-dispersion”** technology is used for creams. It consists in producing oil in water emulsions with a droplet size close to the micron. The main advantage of this technology is that it's using “green” emulsifiers, enhancing the efficiency of the active systems. The product is ultra soft and quickly absorbed by the skin. It leaves a soft protective film over the skin.

#### Skin care goals:

Boost oxygen consumption.  
 Boost metabolic activity and energy.  
 Stop and prevent skin ageing.  
 Rejuvenate aged skins by a natural process.  
 Block and neutralize free radicals.  
 Break down the oxidative stress.  
 Reduce wrinkles and expression wrinkles.  
 Improve the skin tightness and elasticity.  
 Prevent and maintain the skin's functions.  
 Improve the skin structure, cohesion & softness.  
 Rejuvenate the eye contour area.  
 Reduce eye bags and dark circles.  
 Reduce pigmentation and lighten the skin tone.  
 Prevent sun damages.  
 Strengthen the sensitive skin.  
 Reduce irritations, redness and hypersensitivity.  
 Provide the highest skin moisture level.  
 Nourish the skin.  
 Support before and after aesthetic procedures.  
 Maintain beautiful body skin and shapes.

#### Skin care main actives:

Oxygenation factor.  
 DMAE liposystem.  
 Hyaluronic acid.  
 Vectorized glycine.  
 Organic silicon.  
 Q10, C & E vitamin liposomes.  
 Octapeptides & pentapeptides.  
 PFC (perfluorocarbons).  
 Mineral sun protection factor.  
 Natural phytoceuticals & essences.  
 Vectorized phenylalanine.  
 Glutathione & arbutin liposomes.  
 Stabilized vitamin C.  
 Natural vitamin E.  
 Olive oil squalene & esters.  
 Shea butter.  
 Rosehip virgin oil.  
 Enzymes.  
 Vectorized cafeine.  
 Vegetal amino acids.

# Step by Step for a Perfect skin

**Oxynergy Paris®** is a complete skin-care system, created in accordance with a step by step concept. A care system based on two strong pillars: daily use at home and regular treatments in the salon. The beauty therapist analyses your skin's condition and develops a suitable programme for your skin.

**Oxynergy Paris®** not only supports the skin in its regeneration process, but gives it the impulse for more activity, and so significantly increases the cell renewal rate. As its central ingredient, Oxygen factor & organic silicon, other specific ingredients, that respond to special skin problems, supplement each individual products. The concentration of the ingredients has been defined so that they can take their full effect, not only in an ideal form, but also in the shortest time – for results that can be instantly seen and felt.

Your professional treatments with your therapist consist in an intense “shot” of active ingredients. To achieve the best results your therapist will use our exclusive systems.

#### Oxynergy Excellence®

Combines all the technologies needed to perform our world famous “oxygen lift” rejuvenation treatment.

#### Pure oxygen therapy with two main techniques:

Oxygen needle-free jet injection technology to introduce specific serums into the deepest layers of the skin. Thanks to a pulsed flow of pure oxygen and a crystal needle the product is applied over the skin and “pushed” into the skin. This treatment can be performed with 2 hand pieces at the same time for a total effect.

Oxygen atomization to spray serums and pure oxygen over the skin with a patented hand made crystal sprayer. The products is vaporized over the skin and the cooling effect stimulates the microcirculation.

#### Micro dermabrasion:

A fine abrasive powder is sprayed onto the skin in a safe and uniform manner to exfoliate the skin painlessly. Skin cells regeneration along with the production of new collagen and elastin is highly activated.

#### Cryo therapy:

A temperature shock is produced on the skin surface. It is immediately followed by a transfer of temperature to the deep layers. This enables and provokes three main reactions: skin soothing, absorption of products and skin oxygenation.

#### Vaccum massage:

By a controlled pulsed or continuous vaccum, the blood is mobilised in the superficial skin layers. This strong skin stimulation enhances the transdermal delivery and the micro circulation.

**Oxynergy Enhancer virtual mesotherapy**  
 Enhances the transdermal transport of topical products, through the epidermis to the dermis. The radiofrequency (RF) produces a cellular electroporation reducing the permeability of the skin and opening cellular pores. At the same time the radio-frequency (RF) increases the skin temperature of 5 to 7°C to stimulate the collagen synthesis and skin tightening. It allows delivering drugs in a topical way without pain, needle, skin damage or morphological modifications. Active formulas can be introduced at the deepest level of the epidermis and superficial dermis. This technology has been successfully used to enhance the skin permeability to molecules with differing lipophilicity and size including biopharmaceuticals with molecular weights greater than 20 kDA. Face & body can be treated efficiently, results can be seen since the first session and long term results can be achieved after 4 to 5 sessions.
