OXYGEN THERAPY

At peak vitality, a cell breathes, communicates, grows and reproduces. The common denominator in these vital functions is the process of oxygen consumption, sign of a good metabolic activity. This natural cell process is severely affected by modern lifestyle. Due to urban pollutants and environmental attacks, the cell suffers and its metabolic potential decreases. This results in a slowing down in cell regeneration. The result is visible: the skin becomes duller, less tonic. It shows the first signs of ageing.

Oxynergy Paris skin care & treatments boost oxygen consumption and increases the natural energy of our cells. On a long term basis, it stimulates cellular renewal, for a younger, firm, elastic and luminous skin.

TECHNOLOGIES

Pure oxygen therapy with two main techniques:

Oxygen needle-free jet injection technology to introduce specific serums into the deepest layers of the skin. Thanks to a pulsed flow of pure oxygen and a crystal needle the product is applied over the skin and "pushed" into the skin. This treatment can be performed with 2 hand pieces at the same time for a total effect.

Oxygen atomization to spray serums and pure oxygen over the skin with a patented hand made crystal sprayer. The products is vaporized over the skin and the cooling effect stimulates the microcirculation.

Micro dermabrasion:

A fine abrasive powder is sprayed onto the skin in a safe and uniform manner to exfoliate the skin painlessly. Skin cells regeneration along with the production of new collagen and elastin is highly activated. It improves the appearance of scarring, fine lines, wrinkles, pigmentation, uneven skin tones, and dull, lifeless or sun-damaged skin.

Cryo therapy:

A temperature shock is produced on the skin surface. It is immediately followed by a transfer of temperature to the deep layers. This enables and provokes three main reactions: skin soothing, absorption of products and skin oxygenation.

Vacuum massage:

By a controlled pulsed or continuous vacuum, the blood is mobilised in the superficial skin layers. This strong skin stimulation enhances the transdermal delivery and the micro circulation reactivating the skin cells.

Oxygen therapy indications

- Skin and cellular oxygenation
- Anti-ageing
- Reduction of wrinkles and fine lines
- Reduction of expression wrinkles
- Eye contour rejuvenation
- Skin dryness
- Skin lightening & pigmentation
- Soothing
- Transdermal delivery without needle
- Skin tightening
- Microcirculation booster

Micro dermabrasion indications

- Skin resurfacing
- Treatment of sun damages
- Reduction of hyperpigmentation and spots
- Reduction of acne scars
- Reduction of wrinkles
- Reduction of stretch marks
- Improves skin renewal and collagen synthesis
- Improves skin firmness and elasticity

Cryo therapy indications

- Microcirculation booster
- Transdermal delivery by temperature shock
- Skin soothing
- Skin tightening

Vacuum

- Microcirculation booster
- Skin oxygenation

MAIN INTEREST

Oxynergy Excellence by Oxynergy paris is an exclusive designed beauty system concentrating all the advantages of the world newest technologies in Oxygen therapy, Microdermabrasion & Cryo therapy. Oxynergy excellence is combining all the technologies needed to perform world famous "oxygen lift" rejuvenation treatment, the favorite treatment of the stars.

A unique and fashionable design, user-friendly operation. Oxynergy Excellence offers a wide range of applications for all skin types without any side effects. With our complete oxygen skin care range you will achieve impressive results, provide wellness & sheer relaxation.

PURE ESSENCE FOR OXYNERGY ENHANCER

PRESERVATIVE, PERFUME, COLOURING, SILICONE & ANIMAL EXTRACTS FREE

PROFESSIONAL & HOME USE SKIN CARE

PARABEN, PERFUME, COLOURING, SILICONE & ANIMAL EXTRACTS FREE

Oxynergy Excellence® is offering all the technologies for efficient oxygen facial & body treatments with immediate and long-lasting results. The oxygen needle-free jet injection technology allows oxygen and specially selected products to be driven into the skin. It provides the lower layers of the skin with much needed nutrients to repair and restructure from the inside out.

General advantages of Oxynergy Excellence®

- Made in France
- 2 years warranty
- CE approved
- LCD screen & electronic control
- All in one device
- Silent
- Exclusive design

Oxygen Therapy main advantages

- 2 levels of oxygen treatments 6 & 10 liters per min.
- Crystal hand pieces
- 95 % oxygen purity
- Ambient air produced oxygen
- Fast operation

Micro dermabrasion main advantages

- Disposable micro dermabrasion heads
- 14 levels of abrasion
- Auto cleaning system
- Low consumable cost
- Refill with bulk powder (no exclusive cartridge for micro dermabrasion)

Cryo therapy main advantages

- Electronic cooling system (Peltier)
- up to -15°C below room temperature

Facial vacuum main advantages

- Continuous and pulsed vacuum
- 14 levels of intensity
