

OXYNERGY ATOMIZER EDUCATION

"The first impression to people, your skin"

Oxynergy Paris skin programs were developed to look younger look better, and they are designated to become the cosmetic treatment of the 21st Century. Unlike existing procedure-oriented approach, Oxynergy programs address prevention to keep the skin healthier, younger appearing and free of deteriorative signs. Our Objective is to give systematic, natural and safe approach of the skin rejuvenation through a complete range of products and exclusive technologies to bring the products in the heart of the cells. The understanding of the skin can give birth to the most innovative, the most effective and the safest products.

We insist on maximizing, maintaining and managing the skin properly before and after each procedure. Procedure selection must be based on the client's needs. The well being of clients is the first priority. Many cosmetics treatments are available, but the most important is to understand the action mechanism of the procedure to optimize the results. Of great importance is an understanding of the steps to be followed to realise the treatment, and the management of the pre-treatment & post-treatment with **home care products**.

Basically we can say that the barrier protecting the skin must be open, to let the active ingredients penetrate. And after the barrier must be restore or substitute to avoid external aggression from day light (UV), Pollution, free radicals...

Oxynergy Paris is using the latest innovation in cosmetics formulation and a maximum content of natural ingredients of premium quality. All our formulations are adapted to produce the most synergic effects between the skin, the products, and the technology bringing them directly into the skin. Our Skin Technology focuses on treating cells of deep layers of the epidermis and not to maintain superficial coating dead cells that make your skin unhealthy. With our treatment programs your skin recovers a normal renew cycle of 24 days and looks clear and young.

All programs are starting with an intensive treatment period followed by maintenance period in order to establish and improve the gained result. Our treatment and maintenance period are mutable with regard to their composition and timing. All you need is 3 to 5 sessions to achieve excellent and long terms results, but since the first session the customer can feel a drastic improvement of the skin tone, texture and moisture.

The treatments are based on the following steps:

- * Cleansing
- * Peeling
- * Atomization
- * Mask
- * Treating cream

- * Oxynergy Paris home product Treatment

Only the products will change depending on the skin type and indication (refer skin care tables)

Intensive reactivation period:

5 to 10 sessions / one treatment per week
Cosmetics home program

Maintenance period:

1 to 2 sessions per month
Cosmetics home program

Why choosing Oxynergy Paris & how can you reach such results on the skin?

> The peeling & cleansing remove dead cells and impurities during the exfoliation:

- *Speed up the renewing process of the skin while controlling a healthy skin regeneration process.
- * Improves skin micro relief
- * Reduce wrinkles and fine lines
- * Reduce age spots and hyper-pigmentation
- * Remove acne scars
- * Improves softness of the skin

> The temperature shock while using oxygen creates an incredible vascular workout:

- * Improving skin microcirculation
- * Slow down skin ageing
- * Repairs the underlying layers of the skin before they grow to become the visible layers of the epidermis.
- * Thanks to the high amount of blood arriving to the cells their mechanisms are boosted, between others the fibroblast start to produce high amount of collagen and elastin the support materials of the skin, thereby the skin becomes more flexible, soft and wrinkles and fine lines are reduced.
- * During the treatment the high vascular workout help the products to penetrate into the skin and vehicle the actives directly to the cells.

> Pure Oxygen:

- * Oxygen is vital for the cells to produce their energy. Their only source of oxygen is the microcirculation and while we go ageing the microcirculation drops down, so the cells are in lack of oxygen and nutritive materials. Oxynergy stop this process, saturates directly the epidermis in oxygen and keep the skin healthy.
- * Each oxynergy skin care is boosted in anti-oxidants to block all the free radicals.
- * The oxygen is the vehicle of the serums and creams to penetrate into the skin. In atomization, extremely small particles are sprayed over the skin.
- * The oxygen can be produced from the air by our system without any maintenance before 5.000 treatments; it's pure up the 95% free of any dust and bacteria.
- * Oxygen has specific thermodynamic properties that permit to cool it down easily in pulverization.

> The technology:

- * Oxynergy has developed the most advanced oxygen system on the market.
- * 100 % controlled by microprocessor to offer the sharpest treatment and oxygen quality
- * Exclusive patented hand pieces hand made out of crystal and Teflon to preserve the skin care effectiveness
- * CE certificate
- * Made in Germany
- * No maintenance before 5000 treatments

> The exclusive skin care:

- * GMP & ISO certification
- * Made in France skin care & formulated by French cosmetologist
- * Extremely specific emulsion technology based on micro-emulsion that multiplies by 5 to 10 the bioavailability of the active ingredients and the product absorption by the skin.
- * Light textures for optimal skin absorption.
- * Optimized & reduced concentration of preservatives
- * Includes only natural perfumes and colourings
- * Contains extremely high moisturizing factor
- * Improve moisture level of the skin over 20 % on a long lasting basis
- * Leave the skin moist, soft and smooth.
- * Reduce the factors responsible of accelerated skin ageing (Glycation & oxidation).
- * Stimulate a reparative process and promote healthy skin growth.
- * Protects the skin from sun, free radicals and environmental damages.
- * Stops the formation of skin discoloration.
- * Based on the most exclusive active ingredients in their highest concentration ever reach on the market.
 - Argireline (for wrinkles)
 - Liftline (tensor)
 - Hydromanyl (High moisturizing active ingredient)
 - Collagen and elastin
 - Algisium C (Organic siliceous to stop cells oxidation and boost cellular oxygenation)
 - Hyaluronic acid (High moisturizing active ingredient)
 - Liposomes
 - Plants extracts in powder
 - Fresh fruit cells
 - Fruity acids
 - Glycolic acid
 - Kojic acid stabilized
 - Vitamins A, C (stabilized), E, B5
 - Matrixyl
 - Bamboo water
 - Dielectric skin relax
 - Olive oil rich in W3
 - Green tea
 - L-carnitine
 - Caffeine
 - Guarana
 - Centella asiatica
 - Arnica
 - Menthol & camphor
 - etc.

FAQ

Why choosing Oxynergy Atomizer?

The Oxynergy Atomizer is a powerful, flexible, designed and exclusively built system for the skin treatment purpose. It will guarantee the best results and treatment to your customer and offer your clinic the best image.

Difference between Oxynergy skin care and other skin care lines?

Oxynergy Paris focuses first on the quality of the skin care to offer the best results to your customers. This is the reason why our image is as clear as white and silver. Oxynergy Paris is manufacturing directly most of his active ingredients to control 100% their quality and their concentration. Oxynergy Paris is more than a beauty product brand as the most famous anti-ageing doctors recommend it.

Can I use other skin care with Oxynergy Paris device?

Yes, but Oxynergy Paris does not cover any side effects that could result in mixing some skin care products with oxygen and also the damaged that could be caused to our system by the skin care. We cannot be responsible if the reached results are poor.

Oxygen & acne

Oxygen has no direct effect on acne. Oxygen helps to reduce the inflammation process produced by acne so reduce the redness. It's important to use the adapted products to act on the bacteria's responsible of acne and reduce it.

Oxygen & free radicals

Oxygen is containing some free radicals but in very low proportion that is blocked by the skin care, only oxygen in inhalation can produce more oxidation. Even if oxygen is producing oxidation you have to remind that Oxygen is vital for human and the skin is the last organ were the oxygen is delivered. So with ageing and the reduction of skin microcirculation the skin is in dramatic lack of oxygen.

FACIAL TREATMENTS

OXYNERGY FACIAL (Average price 80 € for 1h00 – cost in products 5 €)

Skin cleansing (10 min)
Peeling (10 min)
Oxygen atomization (20 min)
Mask (10 min)
Treating cream & face massage (10 min)

OXYNERGY EXPRESSO (Average price 50 € for 30 min. – cost in products 3 €)

Skin cleansing (10 min)
Oxygen atomization (30 min)
Treating cream & face massage (10 min)

EYE & LIPS CONTOUR FLASH (Recommended price 70 € for 45 min. – cost in products 5 €)

Eyes and lips cleansing (10 min) Doux démaquillant yeux
Oxygen Atomization (20 min) Serum repulpant or hyalu-tense
Mask (10 min) collagen mask
Treating cream & face massage (10 min)

BODY TREATMENTS

FIRMING SOLUTION (Recommended price 60 € for 45 min – cost in products 6 €)

Cleansing (5 min) with sponge and luke warm water
Oxygen therapy (20 min):
Atomization of serum régénérant
Body massage with Soin restructurant (20 min)

Home program: Soin restructurant

SLIMMING SOLUTION (Recommended price 60 € for 45 min – cost in products 6 €)

Cleansing (5 min) with sponge and luke warm water
Oxygen therapy (20 min):
Atomization of serum régénérant
Body massage with the Soin sculptant café (20 min.)

Home program: Soin sculptant café

COOLING SOLUTION (Recommended price 50 € for 45 min – cost in products 4 €)

Cleansing (5 min) with sponge and luke warm water
Oxygen therapy (20 min):
Atomization of serum cryo-dynamisant
Body massage with the Soin cryo-dynamisant (20 min.)

Home program: Soin cryo-dynamisant
